

Crown Paint Company

POLYACRYLIC HARDENER

BX013

PRODUCT DATA SHEET

DESCRIPTION: A special blend of resins and acrylic to improve the gloss and increase the hardness, dry speed, and water resistance of select alkyd enamels. When used as directed, your paint's chemical and weather resistance will be significantly improved.

HOW TO USE: Thoroughly mix 16 ounces **POLYACRYLIC HARDENER** with 1 gallon of Quick Drying Enamel until it is fully incorporated into solution. Reduce as required with appropriate thinner. Mixture must be used within 48 hours. Follow normal painting procedures.
